Vector Class Exercise

1. Write a R program to find Sum, Mean and Product of a Vector.

2. Write a R program to find the minimum and the maximum of a Vector

3. Write a R program to sort a Vector in ascending and descending order.

4. Write a R program to test whether a given vector contains a specified element (hint is element(..))

5. Write a R program to count the specific value in a given vector.

6. Write a R program to access the last value in a given vector (hint explore tail(..))

7. Write a R program to find second highest value in a given vector.

8. Write a R program to find common elements from multiple vectors.

9. Write a R program to list the distinct values in a vector from a given vector (hint, explore unique(..))

10. Write a R program to reverse the order of given vector (hint, explore rev(..))
